## Abstract

**For the high-quality development of higher education, "Lide Shuren" is an important idea. "Lide" is a fundamental indicator for the cultivation of talents in colleges and universities, and it is also the prerequisite and foundation for all knowledge and skills education in higher education. In today's era, facing the second 100-year goal and cultivating talents who can be the task of national rejuvenation, it is urgent to grasp the key points and seek breakthroughs in order to implement the "li morality and cultivating people". The individual conscious effort of college students is a subjective element that cannot be ignored in the work of "Lide Cultivating People", and is an important link and effective starting point for colleges and universities to implement the "Lide Cultivating People" education. Awaken college students' subjective initiative, raise their own requirements, urge them to establish lofty ambitions and ambitions, inspire greater potential and learning motivation in college students, and enable them to have unlimited possibilities to realize greater life value.**

## Keywords

**Higher education; Lide Shuren; Individual college students.**

## 1. The Development of the Educational Thought of "Lide Shuren"

In recent years, a series of new ideas and new proposals for education and teaching reform have been put forward around the reform of the quality of higher education personnel training. From "new engineering, new medicine, new agriculture, new liberal arts", to "curriculum ideological and political", and then to the "14th Five-Year Plan" to open a new chapter of higher education to "high-quality development", these educational reforms are constantly being proposed the core of the new concept contains a common proposition, that is, to cultivate talents who are most in line with the needs of the country and who can be the leaders of the times. Among them, the idea of "Lide Shuren" is the most basic and core work throughout.

Since the 18th National Congress of the Communist Party of China, General Secretary Xi Jinping has attached great importance to the development of higher education. He has repeatedly emphasized the ideas and requirements of "building morality and cultivating people". In order to meet the needs, we should grasp the focus of comprehensively improving the ability to cultivate talents, adhere to the fundamental task of Lide Shuren, and focus on cultivating new people of the era who will take on the responsibility of national rejuvenation." [1] In May 2013, Xi Jinping had a discussion with outstanding youth representatives from all walks of life. Shi emphasized: The majority of young people should closely integrate correct moral cognition, conscious moral development, and active moral practice, consciously establish and practice socialist core values, and take the lead in advocating a good social atmosphere. On March 11, 2021, the Fourth Session of the Thirteenth National People's Congress voted and approved the "Outline of the Fourteenth Five-Year Plan for the National Economic and Social Development of the People's Republic of China and the Long-term Goals for 2035", the tenth outline The three

articles "Improve the Quality of the People and Promote the All-round Development of People" pointed out that the construction of a high-quality education system and the improvement of the quality of the people should be placed in a prominent and important position; in the 43rd chapter "Building a high-quality education system", Emphasizes the need to "fully implement the party's educational policy, insist on giving priority to the development of education, insist on cultivating people with morality, enhance students' civilization quality, social responsibility awareness, and practical skills, and cultivate socialist builders and successors with comprehensive development of morality, intelligence, physical education, and labor. "This is the guiding ideology of the party and the state for the development of higher education in the new era, and it is a further emphasis on the educational theme of "building morality and cultivating people".

## 2. "The Way of the University", "Lide" is the "ben"

"The way of a university lies in Ming Mingde, in being close to the people, and ending in perfection." The first sentence of the opening chapter of "The Book of Rites·University" emphasizes the importance of promoting honesty in learning. "Getting things, understanding, sincerity, righteousness, self-cultivation, family harmony, governing the country, and peace of the world" discusses the relationship between cultivating good moral character and governing the country and the world. The internal moral education of college students is the cornerstone of growth and talent, and the quality prerequisite for the realization of lofty ideals and ambitions. Undoubtedly, the education of "Lide Shuren" is a long-term and systematic project. It has already started from the basic "doll education". The education of students who are developing rapidly and tending to the "finalized period" not only plays a role in further cultivating people for whom, what kind of people, and how to cultivate people, but also on the role of "cultivating people". "How" and "whether the moral and ideological qualities can withstand the test" play a vital "gateway" role. From the perspective of the law of individual growth of college students, a university is a major turning point in a person's life. Studying in a university is an important place to reserve professional knowledge and form ideas and values for future development. Whether it can further grow and become a talent depends to a large extent. The learning cognition, attitudes and values formed at this stage.

The Central Talent Work Conference has been held in Beijing from September 27 to 28, 2021. General Secretary Xi Jinping attended the meeting and delivered an important speech, pointing out: "At present, our country has entered the stage of building a socialist modern country in an all-round way and marching towards the second centenary goal. In the new journey, we are closer to the grand goal of achieving the great rejuvenation of the Chinese nation than at any time in history, and we are more eager for talents than at any time in history." [2] Handsome." University as a place for cultivating talents, "talent training is the process of unity of educating and educating people, and educating people is the fundamental. People have no morals, and the root of educating people lies in morality." [3] General Secretary Xi Jinping Emphasizes: "Ethics is the direction. A person can only use it well if he has a great virtue, abiding by public morality, and strict personal morality." "This virtue has both personal morality and social morality, and it can serve the motherland and serve the people. The great virtue of morality. Only when the morality is "established" can people be "established" and can truly become talents useful to the country and society." [3] For the development of high-quality higher education, "building morality and cultivating people" is an important idea. "Lide" is a fundamental indicator for the cultivation of talents in colleges and universities, and it is also the prerequisite and foundation for all knowledge and skills education in higher education. In today's era, facing the second 100-year goal and cultivating talents who can serve as the pillars of national rejuvenation, we must firmly implement the "Leadership and Talents".

### **3. The Cognition and Efforts of Individual College Students Are the Subjective Elements That Can Not Be Ignored in "Lide Shuren"**

#### **3.1. University Is An "Adult" Study, and the Rational and Conscious Effort to Awaken College Students Cannot Be Ignored**

Different from basic education, "university" is "adults' learning", which is the "adult" period of learning relative to the "primary school" and "middle school" stages. Not only the content and requirements of learning are different, but the management mode and learning method are different. , The degree of self-demand is also very different. In the reform and implementation of higher education concepts, in addition to the incentives of external factors, such as the strategic guiding ideology of national talent training, the implementation of educational policies by the school, and the education guidance of teachers, the degree of individual conscious effort of college students is equally important. A very important point of "Lide Shuren" is to mobilize the internal concepts and strength of the students, enhance the individual consciousness, responsibility and responsibility of the students, and stimulate the students' strong endogenous motivation to be able to consciously learn and overcome difficulties. , And become more persevering and assertive. Looking at the status quo of moral civilization of today's college students, the overall situation is not satisfactory. Affected by some hedonism, money worship, and utilitarianism thoughts and phenomena in today's society, for a long time, going to college has been regarded as a channel for "reading to change destiny" and "social class rise". University is no longer a pure "Ivory Tower", some unsatisfactory phenomena appeared in college students' own ideals, beliefs, values, aesthetic awareness, collective concepts, interpersonal relationships and other understanding and behavioral practices. Humanistic ideas are relatively weak, and elite awareness and responsibility The sense of responsibility is not strong, the motivation for the pursuit of value rationality is insufficient, and the degree of civilization awareness and degree is not enough to match the knowledge and educational level of this group.

The great philosopher Jaspers said: "The essence of education is that one tree shakes another tree, one cloud pushes another cloud, and one soul awakens another soul." The individual conscious effort of college students is to "lead and cultivate people." "The subjective element that cannot be ignored in work is an effective starting point for colleges and universities to implement the education of "Leading morality and cultivating people", and it is a link that urgently needs to arouse wider attention. It is the key to awaken the subjective pursuit and efforts of college students, mobilize their subjective initiative, guide the transformation of college students' ideological understanding and values, and improve their own requirements. College students should abandon the pursuit of success in the secular sense, magnify their ideals and patterns, and develop them. The new look of the youth of the era with conscious responsibility and active actions.

#### **3.2. Establishing Lofty Ambitions and Ambitions Is the Top Priority**

"A person is expensive and ambitious" ,one scholar said in a passage that explains why college students should set up lofty ambitions and ambitions: "Since they have received advanced civilized education in society, civilization has been passed down to this point, and society needs it. This is impossible to get rid of. It is also due responsibilities and obligations. A person's talent is not only to serve his personal fame and fortune and his own pleasure. Since it is the inheritance of power and responsibility of social civilization and social wisdom, you must be firm even if you have difficulties "The lofty ideals and goals of college students are the responsibility, mission and role requirements that college students are given after they can enter the university platform provided by the country and enjoy its various resources. Establishing lofty ambitions and ambitions is the right and duty of college students, and it is the

honor and mission. In the whole process, college students should strengthen their cognition and understanding of their own roles, deepen their thinking about life values, personal responsibilities, goals and pursuits, and constantly improve their ideals. Consciously build a vision and direction of struggle that are integrated with social needs. With ambitious goals and plans, you will not be confused by some immediate benefits, will not be easily troubled by negative emotions, will not be easily overwhelmed by the difficulties encountered, and it will be easier to develop positive optimism. His mentality has become more persevering and persevering, his goals are firmer, and he works hard step by step in a down-to-earth manner, and constantly surpasses himself, so that he has unlimited possibilities to realize greater life value and achieve greater ideals and goals in life. Zeng Zi said in "The Analects of Confucius Tabor": "A scholar must not be unsuccessful, and a long way to go." When pursuing, there is a long way to go. Ideals and beliefs are the core motivation for a person to move forward, and it will give a person a steady flow of inner strength to move forward.

#### 4. Concluding Remarks

Born to be a grand event and shoulder heavy responsibilities, the majority of young students should have the mission of their homeland and country in mind, and build a grand pattern of "cultivating one's morality, coordinating the family, governing the country, and pacifying the world." Requirement, with ideal enthusiasm, solid professional knowledge, young ingenuity, diligent study, and youthful sweat, shoulder the role and mission of college students given by the times, in order to realize the Chinese dream of the great rejuvenation of the Chinese nation and contribute to the development and progress of human civilization, Give full play to the greatest value of the individual and contribute the greatest strength of the individual.
