Abstract

In the new situation, the ideological and political education of art colleges and universities is facing new challenges, but also put forward higher requirements and standards for ideological and political work. Ideological and political education work must be based on the current situation, continuous innovation, continuous improvement, through creating characteristic party building projects, Party building to lead League building, promote Class League building, let the student Party branch, League branch, class adapt to the new situation of the working mechanism, give full play to the important role of Party building, League building, class building in Ideological and political education work. Through the development of characteristic party building projects, the three-dimensional integrated linkage mechanism of party, league and class construction is constructed.

Keywords

Characteristic party building; Three dimensional integration; Overall linkage mechanism.

1. Thoughts on the Construction of Characteristic Party Building Projects

The characteristic party construction in art colleges and universities can not stick to the traditional mode, but need to take a new and characteristic creative route. The idea of construction is to stick to one center, implement two grasping points, rely on three positions, light up the three-star carrier of education through characteristic party construction projects, so as to form a good complementary and integration among the Party branch, Youth League branch and class, form a coordination mechanism in work, and form a three-dimensional integrated overall linkage.

2. The Way to Construct Characteristic Party Building Project

2.1. Stick to One Center

With the guidance of Chinese excellent traditional culture, let teachers and students establish lofty ideals, form advanced party, league and class groups, and boost the realization of the party’s education policy. First of all, the construction of characteristic party building projects in fine arts colleges and universities should adhere to the cultivation of application-oriented talents inheriting local excellent traditional cultural heritage, make use of regional cultural resources, explore cooperative innovation mechanism, serve local industrial teaching system, and promote the creative transformation and innovative development of intangible cultural heritage. Secondly, the characteristic party building work should be closely combined with

174
education and teaching, to achieve the perfect integration of Party building work and education and teaching with the guidance of culture, to highlight the core Battle Fortress role of the Party branch, to reflect the leading role of the League branch, and to play the basic cohesion role of the class. We should cultivate time pioneers and artistic talents with ideal, responsibility and ability.

2.2. Implement Two Key Points
The first is to transform the excellent traditional Chinese culture into the grasp of cultivating students on the basis of theoretical study. We should cultivate the vanguard of the times with ideal, ability and responsibility, and build a strong spiritual force of "cultural education". The second is calligraphy, painting, design and other professional creation as the starting point. Enlighten thinking, link up teaching, cultivate art talents. In teaching, scientific research, local service and other fields, it well reflects the professional advantages.

2.3. Relying on Three Positions

2.3.1. Take the Student Party Branch as the Front
The student Party branch is an important position to give full play to the educational function of Party Construction in Colleges and universities, and is an important core organization of Party Construction in Colleges and universities. It is the most basic organization of the party building institutions in the field of higher education, and an important carrier of Ideological and political education for college students. Take the student Party branch as the position, give full play to the core role of the student Party branch and the vanguard role of the party members, so that the characteristic party construction can reflect the important practical significance in the construction of the three-dimensional integrated linkage mechanism of the party League class.

2.3.2. Take the Student League Branch as the Position
As the grass-roots organization of the Communist Youth League, the Youth League branch is the party's reserve force and important position. It mainly undertakes the important tasks of organizing learning, propaganda and education, serving the youth and leading the youth. It plays a leading role in the party construction work. All its work and activities should be incorporated into the unified track of Party construction, which is of great significance to the promotion of Party construction.

2.3.3. Take the Student Class as the Front
Class is a micro school, is an important position to strengthen the interaction between school and students, plays a basic role in the school party building. The focus of class work is reflected in "education, management and service". Compared with the Party branch and Youth League branch, class work has more administrative characteristics.

3. Three Star Carrier of Education

3.1. Light up the Star of Grassroots Organizations
If the foundation is not firm, the earth will shake. The Party branch, the League branch and the class are the primary organizations of college students, which shoulder the training and management of Party members, league members and young students. Only by lighting up the stars of grassroots organizations can we give full play to the core values of Party members, league members and young students.

First, the Party branch, League branch and class column are set up through the network platform of WeChat official account, micro-blog, QQ official account and so on. Through the network study and network display, the Party branch, League branch and class construction
can be strengthened to reflect the exemplary role of Party members, league members and young students.

Second, through the theme party day, three meetings and one lesson, League organization life, theme class meeting, etc., combined with professional characteristics and Party building guidance, carry out the study of traditional Chinese culture, encourage party members, league members and young students to strive to be pioneers, never forget their original intention, and forge ahead.

Third, the "three bright" action of highlighting standards, identity and commitment, the "three comparison" action of comparing skills, style and achievements, the "three struggle" action of striving to be a pioneer in learning, a pioneer in morality and a pioneer in civilization, the "three bright" action of highlighting the identity of Party members and League members, highlighting post responsibilities, continuously improving professional skills and moral quality, and strengthening and improving professional quality in accordance with the advanced standards and models of colleges and universities. Enhance the leading role of grassroots organizations.

3.2. Lighting up the Star of Campus Culture

Campus culture is an important part of all-round education and the core component of school education and teaching. We should promote the construction of campus culture with characteristic party building activities, integrate campus culture into Party branches, League branches and classes, and infiltrate it into study and life. Let it become the main theme of all work, light up the starlight of campus culture and realize cultural education.

First, by holding reading clubs, organizing party branches, League branches and classes to learn the important speech of General Secretary Xi, learning excellent traditional Chinese culture, reading classics and masterpieces, we can improve students' self-cultivation and create the cultural connotation of Party branches, League branches and classes.

Second, through the research of calligraphy, painting, design and other excellent traditional culture, invite Intangible Cultural Heritage Inheritance artists and cultural masters to the school to carry out special lectures. In the process of research and presentation, let the students learn and inherit the spirit of dedication, lean, focus and innovation, and build the spiritual home of the Party branch, Youth League branch and class.

Third, through a variety of network media to carry out the campus new media art festival, let the socialist core values into the campus new media, improve the way of learning and thinking of college students, establish the ideal and belief of the socialist road with Chinese characteristics. Using the new media platform of the Department, Xi Jinping's new socialist ideology with China's characteristics will lead the university culture and create a new path of Ideological and political education.

Fourth, through professional skills competition, regular calligraphy, painting, design, traditional culture and other skills competition, constantly improve students' professional skills and cultural knowledge. Then through the exhibition of calligraphy, painting, design and other works, the campus will be full of strong cultural atmosphere.

3.3. Light up the Star of Volunteer Service

"Moral education, deeds speak louder than words", characteristic party building projects should strengthen the spirit of volunteer service, take the spirit of dedication, friendship, mutual assistance and progress as the content of Ideological and political education, take volunteer service as an important platform for education and training of student party members, league members and young students, and light up the star of volunteer service.

First, through the establishment of social practice bases for volunteer service in Colleges and departments, we can carry out planned and organized love education and enter the community, organize party members, league members and young students to be left behind children, and
children in poor areas are obliged to carry out love teaching such as calligraphy, painting and handwork, so as to send warmth to the lonely elderly and realize the base, specialization and normalization of volunteer service.

Second, through voluntary service activities such as the dissemination of Chinese excellent traditional culture, the sense of social responsibility of student party members, league members and young students will be continuously enhanced, the core role and combat effectiveness of the Party branch will be continuously enhanced, the appeal and leading role of the League branch will be continuously enhanced, and the cohesion of class level will be continuously internalized, so as to realize the attraction of the party organization among young students and the League organization in the Youth League. The appeal of the class among the young students and the cohesion of the class among the young students.

4. How to Build A Three-Dimensional Integration Mechanism of Party, League and Class Construction under the Characteristic Party Construction

Through the development of characteristic party building projects, the three-dimensional integrated linkage mechanism of Party branch, Youth League branch and class construction is constructed. We should form the basic cohesion of the class, embody the leading role of the League branch, and give full play to the core role of the Party branch, so that class cadres, League cadres, and branch committees can form a unified three-dimensional integrated training mechanism for student cadres, and counselors, general League branch secretaries, and Party branch secretaries can form a three-dimensional integrated allocation mechanism for guiding teachers. Three dimensional integration, coordinated development, to achieve the effect of $1 + 1 + 1 > 3$, based on the “characteristic party building” and the Party branch, Youth League branch, class three-dimensional integrated overall linkage mechanism construction mode, as shown in Figure 1.

![Figure 1](image-url)
4.1. Find out the Position and Function of the Party Branch, the League Branch and the Class

4.1.1. The Core Role of the Party Branch

The Party branch is the grass-roots organization of the party. In the work of characteristic party construction, we should give full play to the influence and role of the Party branch on the League branch and the class, and reflect its core value. So that the Party branch in the process of characteristic party building and League branch, class to establish close contact, promote each other, common development. Because the student party members in Colleges and universities are relatively concentrated in the third and fourth grades, the Party group can be established in the Party branch. The Party group can specifically contact the League branch and the class. Under the guidance of the Secretary of the Party branch, the Party group can play a central role in the construction of the class and League, so that the class and league can form a good political ecology and learning and living atmosphere, and lay a solid foundation for the all-round development of individuals.

4.1.2. The Leading Role of League Branch

First, the Youth League branch is an important position to cultivate reserve talents for the party. In the work of Party construction with characteristics, the Youth League branch should play a leading role and devote itself to the work of grassroots Youth League organization and the training of Youth League members and students. It should carry out patriotic education for Youth League members and students, cultivate students to establish correct outlook on life, values and morality, and guide them to pursue their dreams and realize their dreams. We should cultivate socialist builders and successors with both ability and political integrity for the party. Second, under the guidance of the characteristic party building work, the League branch should pay attention to the connotation construction, create the characteristic culture of the League branch, and create high-quality and distinctive League branch activities with various forms and unique creativity. Give full play to the leading role of the League Cadres in the construction of the League branch, create a good class atmosphere and study atmosphere for the construction of the class, and form a good learning atmosphere.

Third, the Youth League branch should be the starting point for the counselors to carry out their work. Under the guidance of the counselors, combined with the class and professional characteristics, around the characteristic party construction center work, organize all kinds of Youth League learning activities beneficial to the growth of young students, so that the counselors can become a powerful starting point for the characteristic party construction work and the Youth League branch construction.

4.1.3. The Basic Cohesion of Class

Class is the starting point and foothold of university education and teaching, and the most basic unit of implementing quality education. The cultural construction of the class reflects the spirit and value orientation of the class. Class culture integrates many elements such as material, system and spirit, forming a strong educational atmosphere. It has many educational functions, such as condensing class members, stimulating students’ ideal and creative potential, promoting class harmony, and endowing students with aesthetic ability. The party construction leads the league construction, and the league construction promotes the class construction. Through the close cooperation and careful cultivation of the Party branch secretary, the general League branch secretary and the counselors, we can find the right direction, show the soul of the class, and make the class culture an organic part of the College culture.

4.2. Strengthen the Communication Among the Party, the League and the Class

First of all, in the party building work of art colleges, the Party branch, League branch and class are relatively independent, each organization has its own different working methods and
management mode. Therefore, counselors, general League branch secretaries and Party branch secretaries should form a three-dimensional integrated guidance mechanism with close cooperation, so that the Party branch, League branch and class can cooperate sincerely and strengthen communication. Secondly, through the establishment of Party groups in student party branches, different party groups guide the League branches and classes. Fully maintain the communication between Party branch members, class cadres and League cadres, ensure the three-dimensional integrated overall linkage mechanism of Party branch, League branch and class in work, and always maintain the core role of Party branch, the leading role of League branch in service and education, and the basic cohesion role of class. To achieve three pronged, so that the class work and the League branch work effectively combined, steady progress, so that the core work of the Party branch more effective.

4.3. Establish A Three-dimensional Integrated Governance Model with Clear Division of Labor Among Party, League and Class

First, make clear the role of the Party branch as a political fortress. In the work of characteristic party construction, the Party branch should cooperate with the class and League on the same frequency, optimize the use of resources, give full play to the educational role of the class and League in the junior league members and young students, make the Party branch become the core leader, and jointly do a good job in the ideological guidance of League members and young students.

Second, in the construction of the three-dimensional integrated linkage mechanism of the party, the league and the class under the work of characteristic party building, the League branch should play a good role in guiding, serving and organizing. Carry out the party construction work with the Party branch, and do a good job with the class committee in class construction, so as to achieve the connection between the preceding and the following, and truly become a powerful grasp of the construction of the three-dimensional integrated linkage mechanism of the party, the league and the class.

Third, to establish a three-dimensional integrated governance model with clear division of labor among the party, the league and the class, we must first clarify the nature and functions of the Party branch, the League branch and the class in the work of Party construction with characteristics, so as to make their division of labor reasonable, mutual cooperation and mutual progress, and effectively improve the work effectiveness of the Party branch, the League branch and the class. Secondly, we should establish and improve the management system, use the standardized system and regulations as guidance, give full play to the respective roles of the party, the league and the class, and improve their work efficiency, so as to make the characteristic party building a brand in the party building work of colleges and universities.

4.4. Establish A Three-dimensional Integration of 1 + 1 + 1 > 3 and An Overall Linkage Mechanism

First, starting from the new media platform that students gathered, we set up a unified new media platform for Party building work based on the website of colleges, WeChat official account and QQ official account. We guarantee that party branches, League branches and classes participate in the work of Party building under the unified platform and mode, and promote the cooperation of Party branches, League branches and classes with the overall linkage. Secondly, under the new media platform, we will create columns such as learning, volunteer service, competition, three bright, three to three contests, so that the Party branch, Youth League branch and class can carry out self-education, self-management and self-service under the three-dimensional integration platform. Give full play to the core leading role of Party members among students, improve the recognition of Communist Youth League members
among students, and show the style of the times of young students. To achieve the effect of $1 + 1 + 1 > 3$ three-dimensional integration and coordinated development.

5. Summary

The Party branch, League branch and class construction are three-dimensional integration, and the overall linkage mechanism is a long-term preparatory plan. The party and League classes in Colleges and universities are independent of each other, the management mode has its own system, and the student cadres are also independent of each other. The three-dimensional integration of the overall linkage function requires a certain amount of organizational construction precipitation, which can never be achieved overnight. From the beginning of freshmen entering the school, we should start to prepare for the construction, so as to lay a solid foundation for the comprehensive implementation of the three-dimensional integrated linkage mechanism in senior grades. Finally, the overall linkage effect of $1 + 1 + 1 > 3$ can be exerted. Under the characteristic party building work in art colleges and universities, constructing the three-dimensional integrated linkage mechanism and operation mode of party, league and class construction, taking party construction as the guide and league construction as the basis, the integrated construction of class and League is not only conducive to the class, League organization and party organization to give full play to their own functions, but also conducive to giving full play to the systematic functions of class, League organization and party organization in art colleges and universities, and more effective It is conducive to improving the efficiency and effect of Party building work, showing the characteristics and characteristics of art colleges, giving full play to the three-dimensional integration of Party and League class education, and working together to cultivate socialist builders and successors.

Acknowledgments

This paper is one of the results of Sichuan University of Science & Engineering special plan of ideological and political education for college students in 2019, "the construction and practice of a three-dimensional integrated linkage mechanism for party, league and class construction in colleges and universities"(2019FDY04).
