## Abstract

Since the 18th National Congress of the Communist Party of China, General Secretary Xi Jinping has attached great importance to the growth and development of youth, and has made a series of expositions and instructions around the education of youth ideals and beliefs. Especially on the May 4th Youth Day every year, what General Secretary Xi Jinping is most concerned about is the prompting of ideals and beliefs for contemporary youth, which will help college students to better grow and become talents, establish a correct world outlook, outlook on life and values, and grow into Socialist qualified builders and reliable successors have important guiding significance. On the basis of analyzing the value implication of college students' ideal and belief education in the new era, this paper interprets the important content of college students' ideal and belief education in the new era, and puts forward the practical path of college students' ideal and belief education in the new era, in order to provide some ideas for college students' ideal and belief education in the new era.

## Keywords

New era; College students; Ideal and faith education; Value implication; The path.

## 1. The Value Implication of College Students' Ideal and Faith Education in The New Era

College students are the new force to realize the prosperity and strength of the country, the builders of the great rejuvenation of the Chinese nation, and the successors of building socialism. Strengthening the education of college students' ideals and beliefs is of great significance to realize the great rejuvenation of the Chinese nation, form a good social atmosphere, and promote the healthy growth of college students.

### 1.1.1. Promoting National Rejuvenation and National Development

The realization of the great rejuvenation of the Chinese nation and the development of the country is a systematic and complex long-term project, which is inseparable from the efforts and struggles of the majority of students. The ideal and belief education for college students is an important spiritual project and a human heart project for the great rejuvenation of the Chinese nation. At present, college students are in the critical stage of establishing ideals and beliefs. Strengthening the education of ideals and beliefs for college students is a powerful guarantee for the realization of the Chinese dream. The cause of socialism with Chinese characteristics is composed of political modernization, economic modernization, cultural modernization, social modernization, ecological civilization modernization, and the modernization of the ruling party. , such as the quality of all citizens, the modernization of various types of education, and the modernization of the spiritual world of the people. To educate college students on ideals and beliefs is an important measure to practice the cause of socialism and communism with Chinese characteristics.

### 1.1.2. Accelerate the Construction of Socialist Culture and Spiritual Civilization

From the perspective of the ideal and faith education of college students that General Secretary Xi has talked about many times, a very important perspective and dimension is to think and interpret the ideal and faith education of college students from the current situation of cultural diversification and socialist cultural construction. Building a strong socialist culture has always been a topic of concern to General Secretary Xi Jinping. General Secretary Xi Jinping believes that a very important symbol of cultural power is that the people should have faith and spirit. The vast number of young people are the future of the motherland and the hope of the nation, the education of their ideals and beliefs is related to the construction of socialist culture and spiritual civilization can be lasting key, is related to the promotion of China's soft power is an important project. In fact, it puts forward a very important perspective and train of thought for carrying out the ideal and faith education of college students, that is, to think about the ideal and faith education project of college students from the cultural soft power, cultural construction and spiritual civilization construction of the whole country.

### 1.1.3. Speed up the Growth of College Students

Xi Jinping, general secretary of the many times to think from the perspective of youth education and growth, to understand and talk about the problem of college students' ideal faith education, he thought up growth of the youth is related to national rise and fall, relates to the national revival, is related to the happiness of youth itself, so the success of youth growth is very important, it is necessary to strengthen education of the youth growing up. The idea of moral education is to educate young people, among which the education of ideals and beliefs is a directional problem related to the growth of young people. Only when the vast number of young people have scientific and correct ideals and beliefs can they be guaranteed the direction of their growth. In contemporary society, people pay more and more attention to promoting the all-round development of people, especially the young people who shoulder the heavy responsibility, their all-round development and the improvement of comprehensive quality are particularly outstanding. In order to promote the all-round development of college students and promote the harmonious development of society, we should not only constantly improve their knowledge, but also constantly cultivate and guide them to establish and firm their own scientific ideals and beliefs, because ideals and beliefs are the guiding light and spiritual power for people to move forward. Whether their ideals and beliefs are firm or not will directly affect their future social status and the realization of life value. Therefore, we should carry on the "ego" and "ego" understanding to the majority of college students, "ego" consciousness and "ego" combination, so that they can better write meaningful life.

## 2. The The Important Content of Ideal and Faith Education of College Students in The New Era

It is very important to carry out ideal and belief education, and the key is what kind of ideal and belief education to carry out. According to General Secretary Xi Jinping's speech, contemporary college students should establish noble ideals and beliefs, and establish correct and scientific ideals and beliefs, such as practicing Marxist beliefs, firming communist beliefs and socialist ideals and beliefs with Chinese characteristics, etc. The establishment of these ideals and beliefs And practice will enhance the motivation of college students to grow long talents.

### 2.1.1. Practice Marxist Beliefs.

Study theory can make one wise, study Marx The doctrine theory can make people maintain political sobriety and theoretical self-consciousness The letter. General Secretary Xi Jinping sits on the 11th session of the Political Bureau of the CPC Central Committee Emphasis should be placed on learning and mastering the basic principles and methods of historical materialism

The importance of legal theory, he pointed out that some youth groups believe that the communist The essential reason for the illusory and unreachable property is history The belief of materialism is not firm.

### **2.1.2. Firm Communist Faith**

Communism as the highest form of human social development State is the persistent struggle of communists and even the Chinese nation Standard. He brought China's concrete practice into the journey of the communist cause In China, the common ideals of the Chinese people and the greatness of the communist movement They believe that the realization of the Chinese dream of the great rejuvenation of the Chinese nation is an important part of the realization of the communist ideal and belief.

### **2.1.3. Study the System of Theories of Socialism with Chinese Characteristics**

Everyone should learn the theoretical system of socialism with Chinese characteristics and become a faithful believer and active practitioner of socialism with Chinese characteristics. This requires young people to deepen their theoretical understanding of socialism with Chinese characteristics, strengthen our theoretical confidence and institutional confidence, arm their minds with theory, and then take socialism with Chinese characteristics as a spiritual force and elevate it to our common ideal belief.

## **3. The Practical Path of Ideal and Faith Education for College Students in the New Era**

In the new era, we should make full use of all conditions, carry out extensive ideological and political education activities, and improve the long-term mechanism for the education of college students' ideals and beliefs, so as to continuously improve the recognition and practice level of contemporary college students' ideals and beliefs.

### **3.1.1. Enrich the Ideal System of College Students' Ideal and Belief Education, And Promote the Healthy Development of Contemporary College Students' Ideal and Belief Education**

Judging from the ideal and belief education of college students that General Secretary Xi Jinping has talked about many times, a very important perspective and dimension is to think and interpret the educational issues of college students' ideals and beliefs from the current situation of diversified development of Chinese culture and the dominance of socialist cultural construction . Building a socialist cultural power has always been a topic of concern to General Secretary Xi Jinping. General Secretary Xi Jinping believes that a very important sign of a culturally strong country is that the people must have faith and spirit. The majority of young people are the future of the motherland and the hope of the nation, and educating them about their ideals and beliefs is the key to the sustainability of socialist cultural construction and spiritual civilization construction, and an important project related to the improvement of my country's soft power. This actually puts forward a very important perspective and idea for the education of college students' ideals and beliefs, that is, to think about the education project of college students' ideals and beliefs from the perspective of the entire country's cultural soft power, cultural construction and spiritual civilization construction.

### **3.1.2. Enrich the Content System of College Students' Ideal and Belief Education, So As to Continuously Consolidate the Inner Foundation of Contemporary College Students' Ideal and Belief Education**

The content of college students' ideal and belief education is the connotative basis for carrying out college students' ideal and belief education work. Therefore, when colleges and universities carry out college students' ideal and belief education, the content of ideal and belief education should be related to subject education, ideological and political education, education of socialist

core values, and the Chinese dream. The combination of education of the four comprehensive strategies, etc., focuses on the education and guidance of college students on the ideals and beliefs of communism and socialism with Chinese characteristics, and does a good job in the recognition and practice of these ideals and beliefs by college students; The core of self-confidence in the path, theory and system of characteristicism is to fully enrich and enrich the content system of college students' ideal and belief education; with the purpose of college students' identification with the Chinese nation, the Communist Party of China, socialism, etc., to improve the realm of contemporary college students' ideal and belief education .

### **3.1.3. Integrate and Innovate the Ways and Forms of Ideal and Belief Education for College Students, So as to Continuously Enhance the Motivation of Contemporary College Students' Ideal and Belief Education**

The methods and platforms of college students' ideal and belief education are powerful means to carry out college students' ideal and belief education work. Therefore, when colleges and universities carry out college students' ideal and belief education, they must adhere to the main theme of ideological education, firmly grasp the main position of college students' ideological and political education, and focus on ideological and political education. Do a good job of leading college students in terms of moral and political literacy; insist on cultural education, insist on educating young people with excellent traditional culture and advanced modern culture, and insist on developing university culture and campus culture and try to educate young people through cultural methods; Adhere to the practice of educating people, vigorously carry out extracurricular practical activities, volunteer activities, public welfare activities, etc., to promote the practical development of college students' ideal and belief education and life; adhere to psychological counseling and educate people, pay attention to college students' mental health problems, listen to college students' psychological appeals, and The mental health education is combined with the ideal and belief education of college students; Adhere to the network education, set up a network platform for college students' ideal and belief education, and promote the development of college students' concept and belief learning and education network.

### **3.1.4. Focus on Improving the Quality of Ideological and Political Teachers, And Make Every Effort to Consolidate the Main Force of College Students' Ideal and Belief Education**

The main quality of college students' ideal and belief education is the main force to carry out college students' ideal and belief education. Therefore, on the basis of improving the professional quality of college teachers, colleges and universities should pay attention to the professional spirit, professional ethics, ideological and political quality, cultural quality and other aspects of college teachers. Cultivating and striving to provide a double-qualified teacher team for college students' ideal education; at the same time, it should also focus on improving the knowledge quality of college students themselves in terms of history, philosophy, literature, aesthetics, etc., as well as improving the ideological and moral quality and political quality of college students In order to lay a good foundation for the culture, knowledge and ideology of the audience of college students' ideal and belief education.

### **3.1.5. Focus on the Configuration of Software and Hardware Facilities, And Continuously Enhance the Guarantee Force and Assessment Mechanism of College Students' Ideal and Belief Education**

Of the basic conditions for the ideal faith education of university students is a powerful guarantee for the conduct of college students' ideal faith education, so the concept of college students' belief education, must be careful analysis xi jinping, general secretary of college students' ideal faith education instruction spirit, and more investment funds, to configure the material conditions of college students' ideal faith education need, Strive to configure the ideal

and faith education of college students need software facilities; Centering on the cognition and practice of college students' ideas and beliefs, we should constantly improve the assessment mechanism and system of college students' ideas and beliefs education.

#### 4. Conclusion

The ideal and belief education of college students is a systematic and complicated long-term project, which needs the cooperation of the state, society and students, and also needs to try and explore from different perspectives. General Secretary Xi Jinping's instruction spirit on the ideal and faith education of college students provides a good train of thought and perspective, points out the direction of education and provides rich educational materials. At present, it is important for colleges and universities to carry out the ideal and faith education of college students closely around the guiding spirit of General Secretary Xi Jinping on the ideal and faith education of college students. Combining the requirements of higher education and the ideological and political status of college students, colleges and universities should carry out the ideal and faith education of college students in various aspects, and constantly enrich and improve the spiritual and cultural home of college students. To truly cultivate successors and practitioners of the ideals and beliefs of communism and socialism with Chinese characteristics.
