## Abstract

By discussing the integration of traditional art education and modern art curriculum, this paper analyzes the evolution and characteristics of the two in the historical context, and puts forward the trend of integration education. It further expounds the strategies of integration, including traditional-based, modern-oriented and two-way interaction, and proves the implementation and effect of integration art education through practical exploration. Through the comparison and analysis of typical cases at home and abroad, this paper summarizes the Enlightenment and reference of the integrated art education. It aims to provide new ideas and directions for the field of art education, and promote the deep integration and development of traditional art and modern art.

## Keywords

Traditional art education; Modern art curriculum; Integration education; Practical exploration; Case analysis.

## 1. Introduction

In the field of art education, there is tension between traditional art education and modern art curriculum. Traditional art education pays attention to the inheritance and imitation of classical art works, and emphasizes the mastery of techniques and forms, while modern art courses pay more attention to the cultivation of innovative spirit and practical ability, the pursuit of artistic diversity and experimentation. With the continuous development and transformation of society, the integration of traditional art education and modern art curriculum has become an inevitable trend.

## 2. Historical Context: The Evolution of Traditional Art Education and Modern Art Education

### 2.1. The historical accumulation and characteristics of traditional art education

The traditional art education is deeply rooted in the cultural soil of all nationalities, and has formed a unique education system and teaching methods after thousands of years of inheritance and development. Its master-apprentice transmission, oral teaching as the main way, pay attention to the students' artistic perception and expression of the training. Traditional art education emphasizes the imitation and study of classical art works, and the Mastery and application of traditional art forms and techniques. In a long period of time, this educational method has trained a large number of outstanding talents for the art field, and also

made important contributions to the inheritance and development of art. With the continuous development and transformation of society, traditional art education is also facing some challenges. Because of the closed and conservative nature of traditional art education, it has limited the innovation and development of art to a certain extent, traditional art education needs to update and expand its teaching content and methods to meet the needs of the times.

## **2.2. The rise and reform of modern art curriculum**

With the development of modern art, the curriculum of modern art is rising. It breaks through the limitation of traditional art education, pays attention to cultivating students' innovative spirit and practical ability, and emphasizes the exploration and experiment of new art forms. Modern art courses are characterized by openness, pluralism and innovation. New Art Concepts, art forms and teaching methods are constantly introduced to inject new vitality into the art field. Modern Art courses also face some challenges. Because of the diversity and complexity of modern art, it is difficult for students to choose and master it. The curriculum of modern art specialty needs to be updated and perfected continuously, to meet the changing needs of the arts and society.

## **2.3. From segregation to convergence: An Analysis of trends in inclusive education**

Although there are some differences and differences between traditional art education and modern art curriculum, they are not totally opposite. In fact, with the continuous development and change of the times, the trend of integration between the two is becoming more and more obvious.

(1) The traditional art education and the modern art specialized curriculum have certain commonness in the educational goal. The basic aim of both traditional art education and modern art curriculum is to cultivate art talents with innovative spirit and practical ability. The two are highly compatible in the educational goal.

(2) The teaching contents and methods of traditional art education and modern art courses can also be used for reference and integration. The traditional art education can introduce the concept and form of modern art to make it more in line with the needs of the times, and the curriculum of modern art can also learn from the classic works and techniques of traditional art education, enrich its teaching content and methods.

(3) The integration of traditional art education and modern art curriculum is also an inevitable trend in the art field. With the continuous progress of science and Technology and social development, the field of art is constantly expanding and innovation. The integration of traditional art education and modern art curriculum will inject new vitality and impetus into the development of art field.

## **3. Integration Strategy: The Combination Mode of Traditional and Modern Art Education**

### **3.1. Keeping Integrity and Innovation: Modern Art Education Path based on tradition**

It is an important mission of modern art education to stick to the integrity of tradition and pursue the change of innovation. Under this strategy, traditional art education is not only regarded as the heritage of history, but also the source of inspiration for modern art creation. Modern art education must be based on the traditional art education of the deep soil, from which to draw nutrients, and then open a flower of innovation. Innovation means that in the process of art education, we should not only pay attention to the in-depth study and mastery of traditional art techniques, but also emphasize the profound understanding of traditional art

ideas. Including the various historical periods and schools of classical works of art for detailed appreciation, so that students feel the charm of traditional art and depth.

Integrity is not conservatism, innovation is the goal. On the basis of mastering traditional art, modern art education should encourage students to re-examine and interpret traditional art with a more open perspective and mode of thinking. By using modern art concepts and techniques, students can recombine, transform and sublimate the elements of traditional art, thus creating works of art with both traditional charm and characteristics of the times. The key to carrying out the innovation strategy of integrity is the educator. Not only need to have a profound traditional art literacy, can accurately interpret and teach traditional art, but also need to have a strong sense of innovation and ability, can guide the student to discover and excavate the innovation point in the traditional art. Only in this way can the modern art education really keep the root of tradition and develop the flower of innovation.

### **3.2. Lead the tradition: take the modern as the guidance traditional art education renewal**

In the tide of art education, tradition and modernity are not mutually exclusive, but can co-exist harmoniously. The modern-oriented renewal strategy of traditional art education is based on respecting the core spirit of traditional art and skillfully incorporating the elements and ideas of modern art, let the traditional art radiate new vitality in the modern society.

(1) to update the content of traditional art education. It is not only the inheritance of techniques and forms, but also the excavation and propagation of the profound cultural connotation behind traditional art. According to the aesthetic demand and development trend of modern society, educators need to introduce modern art elements so that traditional art can keep up with the times while keeping its unique charm.

(2) the improvement of teaching method. Traditional art education often pays attention to imitation and inheritance, while modern art education pays more attention to innovation and practice. Educators need to explore new teaching methods, such as project-based learning, interdisciplinary cooperation, to cultivate students' innovative thinking and practical ability.

(3) the change of educational concept. Educators need to have modern art literacy and education ideas, to guide students to re-examine and interpret the traditional art from a modern perspective. Not only can help students understand traditional art more deeply, but also can inspire their creative inspiration and promote the innovation and development of traditional art.

### **3.3. Two-way interaction: the Dynamic equilibrium of traditional and modern art education**

When exploring the best way of art education, traditional art education and modern art curriculum do not exist in isolation, but can be Dynamic equilibrium through two-way interaction strategy. The balance is not a simple compromise, but a mutually reinforcing and complementary state of harmony. While adhering to its profound cultural background, traditional art education can actively introduce advanced teaching ideas and technical means in the curriculum of modern art specialty. For example, the integration of digital art, virtual reality and other modern technology into traditional art teaching can not only enrich the teaching content, but also enhance students' learning interest and practical ability. While pursuing innovation, modern art courses should also tap into the classic works and techniques of traditional art education, draw inspiration from them, and integrate them into modern art creation. Educators play a crucial role in this two-way interaction strategy. Not only need to have a profound artistic literacy, but also need to have a cross-border vision and ability. It can find the proper balance point between tradition and modern, and promote the diversification and all-round development of art education. Not only in the content and methods of teaching,

but also in the cultivation of students' artistic quality and creative ability. Through the two-way interaction strategy, we can expect the art education field to usher in a broader prospects for development. This strategy not only helps to improve the overall quality of art education, but also helps to train excellent talents with both traditional culture and modern art innovation ability. These talents will become the backbone to promote innovation and development in the field of art, and contribute their wisdom and strength to the prosperity and progress of human art.

## **4. Practice Exploration: The Implementation and Effect of Integration Art Education**

### **4.1. The reconstruction of curriculum system and the fusion of content**

In the exploration of the integration of art education, the reconstruction of curriculum system and the integration of content are regarded as a crucial task. The aim of this initiative is to break the long-standing boundary between traditional art education and modern art curriculum, and to realize the deep intersection and organic integration of the two contents. The reconstruction of curriculum system involves the overall arrangement and redesign of traditional art education curriculum and modern art professional curriculum. Educators need to dig deeply into the internal relationship and common ground between traditional art and modern art, and build a new curriculum system based on this. The new system not only contains the core techniques and theoretical knowledge of traditional art, but also actively introduces the latest ideas and practical achievements of modern art, thus achieving a seamless joint between the two. In the aspect of content integration, educators have formed a series of art education courses with cross-border nature through the deep integration of traditional art and modern art curriculum. These courses combine the classical elements of traditional art with the innovative ideas of modern art, so that students can get in touch with the diversity and experimentation of modern art. For example, in traditional painting courses, educators can introduce digital painting technology, so that students can learn traditional painting techniques, but also can experience modern technology for the creation of new possibilities; In the course of modern design, educators can integrate traditional decoration elements and guide students to draw inspiration from traditional culture and create works with modern feeling and traditional cultural charm.

### **4.2. Innovation of teaching methods and cross-border practice**

In the practice of integrating art education, the innovation of teaching method is particularly crucial. Traditional teaching methods, such as teaching and demonstration, have played an important role in the past, but it is difficult to meet the diverse learning needs of students in the present era. While retaining and optimizing the traditional teaching methods, actively introducing modern teaching methods has become an important direction in the reform of teaching methods. The introduction of modern teaching methods, such as multimedia teaching and online teaching, not only makes the teaching content more vivid and vivid, but also greatly improves the learning efficiency and participation of students. For example, through multimedia teaching, students can directly understand the traditional arts techniques and processes, while online teaching provides students with a more flexible and convenient way of learning, so that it can be anytime and anywhere to learn. Cross-border practice is also regarded as an important part of the reform of teaching methods. The practice extends beyond the classroom to encourage students to apply what they have learned to their lives and work. For example, organizing students to participate in creative projects that combine traditional and modern art not only allows students to acquire knowledge and skills in practice, but also to develop their innovative thinking and cross-border collaboration skills. Cross-border practice

also provides a platform for students to show their talents, so that they gain a sense of achievement and self-confidence in practice.

### **4.3. Sharing of teaching resources and platform construction**

In the practice of integrating art education, the sharing of teaching resources and the construction of teaching platform play an indispensable role. In order to ensure that students can obtain a comprehensive and efficient learning experience, the school is committed to the integration and optimization of a variety of teaching resources both inside and outside the school. (1) by making full use of the resources in the school such as library, Art Museum, laboratory, etc. , the school provides students with broad study space and practice place. Not only has collected the rich art book and the material, but also has displayed the numerous classical art works, helps the student to widen the field of vision in the study, obtains the inspiration.

(2) the university also actively establishes cooperative relations with universities and enterprises outside the university to share all kinds of high-quality resources. It not only provides students with more internships and employment opportunities, but also gives them access to the latest artistic concepts and technologies.

(3) in order to meet students' individual learning needs, the school also makes great efforts to build online teaching platform. Not only the collection of rich online course resources, such as art education MOOCs (MOOCs) , but also provides convenient learning tools and communication space. Students can choose the courses they are interested in on the platform, and communicate and discuss with other students and teachers in real time.

### **4.4. The improvement of teachers' ability and team building**

In the in-depth practice of integrating art education, the improvement of teachers' ability and team building is particularly critical. In order to ensure the quality of education and teaching results, schools must pay attention to the professional ability of teachers and team cooperation ability.

(1) the school provides teachers with opportunities for continuous learning and growth through regular training, seminars and exchange activities. These activities aim to enhance the professional quality of teachers and enable them to master the latest art education concepts and teaching methods. Through communication and sharing with other teachers, teachers can constantly expand their horizons and learn new teaching inspiration.

(2) inter-disciplinary co-operation and research among teachers was encouraged to break down disciplinary barriers and promote diversified development of arts education. This interdisciplinary cooperation not only helps teachers to inspire and complement each other, but also forms a team of teachers with innovative spirit and practical ability. The team can provide students with a more comprehensive and integrated art education experience.

(3) the promotion of teachers' ability and team building provide a strong guarantee for the implementation of integrated art education. By improving their own ability and strengthening teamwork, teachers can better deal with the challenges and problems in art education and promote the overall development of art education. Teachers in practice constantly explore and innovation, art education to inject new vitality and power, to train more innovative thinking and cross-border ability of art talents.

## **5. Conclusion**

As an important trend of contemporary education, the integration of art education aims at combining traditional art education with modern art curriculum to cultivate students' innovative spirit and practical ability. Through the reconstruction of curriculum system and

content integration, the innovation of teaching methods and cross-border practice, the sharing of teaching resources and platform construction, as well as the improvement of teachers' ability and team building, integrated art education has achieved remarkable results. The analysis of typical cases at home and abroad further proves the feasibility and effectiveness of the integration of art education, and provides useful reference and inspiration for other universities. In the future, with the continuous progress of science and technology and the development of society, integrated art education will continue to play an important role in promoting innovation and development in the field of art.
